Breathe Easier with a Duct Cleaning

It is said that people spend between 60-90% of their time indoors and the air indoors is much more polluted than the air we breathe outdoors. Dirt, mold, bugs, mites, and other "stuff" are all living in your duct system. We can get rid of it all with our Roto-Brush cleaning process. You will be able to see for yourself all of the dirt and debris that we remove from your duct system. More importantly, through the use of remote video inspection cameras, you will also be able to see how clean your duct system is when we finish cleaning!

Having build-up in your ductwork can restrict the flow of air in your home and affect the efficiency of your system, as it did for this homeowner.

Indoor Air Quality Solutions

BLUE-TUBE UV

The most popular Germicidal UV Light system in the world because of its reliability, ease of installation, innovative features, and quality components. This powerful light kills germs continuously in the air and on surface inside the air system.

\$295⁰⁰

APCO MAG-15 UPGRADE KIT FOR UV

APCO cells removes airborne contaminants as the air is circulated by the central air system. Airborne microbes and volatile organic compounds (odor molecules) are captured by the APCO activated carbon matrix and held in place by the microscopic structure where they are neutralized by a process called photocatalytic oxidation.

\$355⁰⁰

APCO WHOLE-HOUSE PURIFIER

APCO's unique combination of UV-C light and activated carbon achieves unmatched microbial and odor reduction without producing any harmful ozone. APCO is particularly effective at reducing odor-causing volatile organic compounds (VOCs) which include toxic chemical vapors like formaldehyde and toluene.

\$745⁰⁰

HONEYWELL 4-INCH FILTER BOX

Up to 14 times more effective than a standard one-inch filter, capturing up to 96% of airborne particles. Lasts up to four times longer than a standard one-inch furnace filter. Replace every 6-12 months versus monthly or quarterly changes.

\$349⁰⁰

4-INCH REPLACEMENT FILTER

Assorted sizes to fit Honeywell and competitive brand media air cleaners. Provides high levels of MERV (Minimum Efficiency Reporting Value) filtration to capture airborne particles. Features a low pressure drop to maintain strong airflow throughout the life of the filter.

\$ 89⁰⁰

WHOLE HOME ELECTRONIC FILTRATION (at the unit)

Low energy consumption, using only 30 watts of power and running only when the system fan is operating. Lower airflow resistance than media air cleaners of similar cleaning performance. Easy to maintain: washing the collector cells takes only 15 minutes every 3-6 months, restoring them to their original cleaning efficiency.

WHOLE HOME ELECTRONIC FILTRATION (in the wall return)

Low energy consumption, using only 30 watts of power and running only when the system fan is operating. Lower airflow resistance than media air cleaners of similar cleaning performance. Easy to maintain: washing the collector cells takes only 15 minutes every 3-6 months, restoring them to their original cleaning efficiency.
